《广州首辆搭载安全逃生系统的公车诞生了》

导读:公车搭载新型安全逃生系统，一键应急，同时开启9个逃生通道，妈妈再也不用担心我的安全了

GUANGZHOU - A bus featuring a new security system debuted in south China’s Guangdong province on Friday to make it easier for passengers to escape during emergencies.

??

The electric-powered bus, designed by the Municipal Commission of Transport in Guangzhou, will perform trial runs before it is adopted more widely.

??

According to Zhao Jiantong, manager of the information office of the Guangzhou electrical bus company, there are eight emergency buttons inside the bus. One of the buttons is for the driver, while the remaining seven are for passengers and are located near seven safety windows.

The safety windows are larger than those on the old buses and are positioned lower to allow seniors and children

to escape.
